Hello Dennis,

Not to confuse you, but the original letter I drafted to NRCS was more focused on the specific question about our work in Yakima being part of a larger, national initiative. Bill expanded it quite a bit to tell the rest of our story.

I thought I would send you the original in case you think HQ wants a more focused letter. I definitely support telling more of our story, but am concerned that HQ might sit on it.

Since we are not sure who from HQ needs to review this we are leaving it in your hands. Let me know if you need any help, or if you want the letter (either version) redrafted.
